PROJECTS

- Online Room Booking Application: The Abrigo Rooms web application helps users to find and reserve rooms online. This application features a responsive UI, making it suitable for mobile devices also. It also includes a OTP generation system, Captcha based challenges to block bots, automated confirmation mails, export to PDF and Excel formats and Paypal integration to accept payments.
- Control – Android Application to Remotely Control Desktop. A mobile application that enables to send key strokes and mouse moves to Desktop nearby using Wi-Fi. Utilizes the device accelerometer and gyro meter data to generate complex keystroke simulation to enable being utilized for gaming. A demonstration of the initial prototype was presented at IIT Bombay at the Final round of National Entrepreneur competition - Tech Hunt 2013.
- Ride – Trip Manager Mobile Application. The trip manager android application allows to help members on a trip to unknown places by enabling the sharing of location, emergency alerts, tagging of meeting points, broadcasting agenda and travel schedule. The application enables the synchronization of members of a common expedition.
